## REASONS FOR ALLOWANCE

1. Claims 1-7 are allowed. All claims thus being allowable, prosecution on the merits is closed in this application. A statement of the examiner's reasons for allowance is provided in the following paragraph.

2. The instant application is deemed to be directed to a nonobvious improvement over the invention of Japanese Laid-open Patent Application 2000-258684, disclosed by applicant as being a representative example in the art to which the instant invention pertains. In particular, said improvement provides a simple, compact, imaging lens consisting of only two lens components; which satisfies a particular combination of two (2) conditional relationships recited in applicant's sole independent claim (Claim 1, Lines 9-10) so as to favorably correct both distortion and curvature-of-field, while providing a sufficient distance from the imaging lens to the exit pupil thereof. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of applicant's sole independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
